MOHAMMED ALI. A

(Full Stack Developer)

Phone: 8681953795 Email: mohdali02064@gmail.com
Linkedin: linkedin.com/in/mohammed-ali-0438a730a Portfolio: mohad-ali.github.io/Portfolio-Ali

SUMMARY

- Experienced **Full Stack Developer** proficient in **MERN** stack technology, including **MongoDB**, **Express.js**, **React.js**, and **Node.js**, with a strong focus on building **scalable and dynamic web applications**.
- Proficient in **Front End Technologies** like **HTML5**, **CSS3**, and **JavaScript (ES6+),** Skilled in implementing **RESTful APIs** and **database management** using **MongoDB**.

EDUCATION

M.S.C, Computer Science
University Of Madras, Shree Chandraprabhu Jain College
CGPA: 8.4 (Jul 2022 – May 2024)

B.C.A, Computer Application
University Of Madras, L.N.G College
CGPA: 8.1 (Jul 2019 – May 2022)

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript ES6+, Node.js.
- **Libraries:** React.js, Zustand, Basic Locomotive and Framer Motion.
- **Frameworks:** Tailwind CSS, Express.js, Basic GSAP.
- **Tools:** Git, EJS, VS Code, Canva, Figma.
- **Database:** MongoDB.

PROFESSIONAL EXPERIENCE

Front End Developer
Razon & Co | Jul 2025 – Dec 2025

- Developed completely **responsive and scalable web applications** using **React.js** and **Tailwind CSS** for better performance and user experience on different devices like **mobile**, **tablet**, and **desktop**.
- Created **complex animations and interactions**, such as **smooth user interface movements**, using **GSAP**, **Framer Motion**, and **Locomotive Scroll** libraries.
- Effectively handled **global and local state** with **Zustand**, as well as integrating with **RESTful APIs** and working with **cross-functional teams** to develop **optimized**, **maintainable**, and **high-performance frontend applications**.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern
Why Global Services | Sep 2024 – Feb 2025

- Developed and maintained **scalable full-stack web applications** using the **MERN Stack** (**MongoDB**, **Express.js**, **React.js**, **Node.js**).
- Created **responsive and reusable UI components** with **React.js**, enhancing **user experience** through effective **state management and optimization**.
- Developed **secure RESTful APIs**, **authentication schemes**, and added **real-time capabilities** to improve **application performance**.

CERTIFICATES

Full Stack Development (Feb- 2025)
ML using Python (may-2021)

LANGUAGES KNOW

- English, Hindi, Tamil and Urdu

PROJECTS

Chat App: https://chat-app-by-ma.onrender.com

- Developed a **real-time chat application** using **React.js** for the frontend and **Node.js with Express.js** for the backend, paired with **MongoDB for database** management. Integrated **Socket.IO** for **instant messaging and real-time communication** between users.
- Implemented **secure authentication with JW**T for **user signin**, **signup**, and **logout**. Enhanced user engagement by adding notification sounds to alert users of new messages, ensuring a dynamic and interactive experience.

Netflix Clone: https://mern-netflix-clone-o2vm.onrender.com

- Built a **Netflix clone using React.js** for the frontend and **Node.js with Express.js** for the backend. Implemented **token - based authentication** for **secure user login** and **session management**.
- Sourced movie data from the **TMDb API**, integrating **streaming capabilities** and delivering detailed movie information. **Used Zustand for state management,** ensuring a **scalable** and **efficient** solution. The app is **fully responsive**, offering an optimized user experience across all devices with **adaptive design**.

Investor App:

- The Investor project is **a modern portfolio website** developed for Al Khateeb Group to showcase their **investment portfolio** and **services**. It was built using **React.js and Tailwind CSS** with a clean **UI** and **fully responsive** design for all devices.
- Smooth animations and interactive transitions were implemented using **GSAP and Framer Motion** to enhance the **user experience**. The project follows a **component-based** React structure to ensure **scalability** and **maintainability.**

Bubble game: https://mohad-ali.github.io/bubble-gm/

- A simple **bubble popping game** displays bubbles that randomly appear in a game area. Players click the bubbles to **pop them and increase their score**.
- **HTML** creates the game layout, **CSS** styles the bubbles and game area, and **JavaScript** manages bubble creation, popping actions, and score updates.

Ochi design: https://mohad-ali.github.io/ochi_design/

- I built the **Ochi Design** website using **React.js** to create a fast, scalable, and high-performance experience **for large devices**.
- Smooth scroll effects, animations, and interactive transitions were implemented with **Locomotive Scroll**, **GSAP**, and **Framer Motion.**

Old Cuberto: https://mohad-ali.github.io/old-cuberto-design-page/

- This project was built using **HTML**, **CSS**, and **JavaScript** along with animation libraries like **GSAP** and **Shery JS** to create a **dynamic and interactive web** experience. It includes features such as a **mouse-follow** effect, **magnet animations** that attract div elements, and **smooth scroll-based** animations powered by **ScrollTrigger**.
- The animations are optimized for **smooth performance** using **Shery JS**, ensuring fluid interactions and responsive motion effects. This project is designed specifically for **large-screen devices** to deliver the best **visual** and **interactive** experience.

Rejouice: https://mohad-ali.github.io/rejouice-design/

- I created a visually striking **Rejouice** - inspired website using **HTML**, **CSS**, and **JavaScript**, enhanced with advanced animations powered by the **GSAP** library. The design focuses on delivering a modern layout with smooth transitions and an engaging visual experience.
- This project is currently **optimized for large-screen** devices only and is not yet responsive. The primary goal was to craft a captivating desktop experience, with responsive improvements planned for future development.
