SUMMARY

- Experienced Full Stack Developer specializing in **MERN stack (MongoDB, Express.js, React.js, Node.js)**, with a strong focus on building scalable and dynamic **web applications**.
- Proficient in **front-end technologies** such as **HTML5**, **CSS3**, and **JavaScript (ES6+),** Skilled in implementing **RESTful APIs** and **database management** using **MongoDB**.

EDUCATION

M.S.C, Computer Science
University Of Madras, Shree Chandraprabhu Jain College
CGPA: 8.4 (Jul 2022 – May 2024)

B.C.A, Computer Application
University Of Madras, L.N.G College
CGPA: 8.1 (Jul 2019 – May 2022)

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript ES6+, Node.js.
- **Libraries:** React.js, Zustand, Basic Locomotive and Framer Motion.
- **Frameworks:** Tailwind CSS, Express.js, Basic GSAP.
- **Tools:** Git, EJS, VS Code, Canva, Figma.
- **Database:** MongoDB.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern
Why Global Services | Jun 2024 – Nov 2024:

- **Engaged in full-stack development projects** using **React.js**, **Node.js**, **Express.js**, and **MongoDB**.
- Implemented **React.js** to build **interactive user interfaces** and enhance the user experience with **component-based architecture** and **state management**.
- Collaborated with senior developers to integrate **real-time functionality** using **Socket.IO** and implement **authentication systems**.

Certifications: Full Stack Development (Feb- 2025)

PROJECTS

Chat-App:

App link - https://chat-app-by-ma.onrender.com

- Developed a **real-time chat application** using **React.js** for the frontend and **Node.js** with **Express.js** for the backend, paired with **MongoDB** for **database management**. Integrated **Socket.IO** for **instant messaging** and **real-time communication** between users.
- Implemented **secure authentication** with **JWT** for **user login**, **signup**, and **logout**. Enhanced user engagement by adding **notification sounds** to alert users of new messages, ensuring a dynamic and interactive experience.

Netflix Clone:

App link - https://mern-netflix-clone-o2vm.onrender.com

- Built a **Netflix clone** using **React.js** for the frontend and **Node.js** with **Express.js** for the backend. Implemented **token-based authentication** for **secure user login** and **session management.**
- Sourced **movie data** from the **TMDb API**, integrating **streaming capabilities** and delivering detailed movie information. Used **Zustand** for **state management**, ensuring a **scalable** and **efficient** solution. The app is **fully responsive**, offering an optimized user experience across all devices with **adaptive design**.
